SUMMARY

Backend engineer focused on payment systems and data pipelines. I like boring, well-tested services and clear on-call runbooks.

EXPERIENCE

Senior Software Engineer, Rice-Singleton (2023 - Present)

- Mentored two junior engineers through their first production launches.
- Implemented a vehicle routing heuristic that shortened average delivery windows.
- Owned push notification delivery and cut duplicate sends to near zero.
- Built the accessibility checklist for our component library and fixed the worst screen-reader bugs.

Software Engineer, Reed, Reynolds and Boone (2019 - 2023)

- Reviewed pull requests for an open-source wallet library and fixed its fee estimator.
- Migrated twelve cron scripts into Airflow DAGs with alerting and retries.
- Introduced SLOs for the four customer-facing services and wired them into dashboards.

SKILLS

Python, PostgreSQL, Airflow, AWS, Terraform

EDUCATION

B.S. Computer Science, Pinecrest Polytechnic, 2015
