SUMMARY

Highly motivated Senior Full Stack Blockchain Developer with 9+ years of experience designing, developing and deploying scalable decentralized applications, DeFi protocols and enterprise web platforms. Proven track record of delivering high-quality solutions in fast-paced remote environments.

EXPERIENCE

Senior Software Engineer, Daniel, Thompson and Booker (2023 - Present)

- Architected and implemented secure smart contracts in Solidity and Rust for DeFi lending and staking protocols with over $50M TVL.
- Developed responsive and user-friendly front-end applications using React, Next.js, TypeScript and Tailwind CSS.
- Built robust RESTful and GraphQL APIs with Node.js, Express and NestJS, integrating PostgreSQL and MongoDB databases.
- Integrated Web3.js, Ethers.js and wallet providers including MetaMask and WalletConnect for seamless user onboarding.

Software Engineer, Fisher, Grimes and Burns (2020 - 2023)

- Optimized gas usage and improved transaction throughput by 40% through contract refactoring and batching strategies.
- Collaborated with cross-functional teams in an Agile environment, participating in code reviews, sprint planning and daily stand-ups.
- Deployed and maintained cloud infrastructure on AWS using Docker, Kubernetes and CI/CD pipelines with GitHub Actions.

SKILLS

Solidity, Rust, JavaScript, TypeScript, React, Next.js, Node.js, NestJS, Web3.js, Ethers.js, Hardhat, AWS, Docker, Kubernetes, PostgreSQL, MongoDB

EDUCATION

B.S. Computer Science, Westbrook State University, 2016
