SUMMARY

Data engineer building batch and streaming jobs for analytics teams. Before that I was a statistician in public health research.

EXPERIENCE

Senior Software Engineer, Carpenter Group (2024 - Present)

- Rolled out a secrets manager and removed long-lived keys from repositories.
- Replaced a homegrown feature-flag service with an open-source one and documented the rollout.
- Migrated twelve cron scripts into Airflow DAGs with alerting and retries.
- Taught a lunch-and-learn series on SQL window functions for analysts.

Software Engineer, Carrillo, Hernandez and Collins (2022 - 2024)

- Built the warehouse model that finance uses for monthly close.
- Maintained streaming jobs in Spark that feed fraud and pricing models.
- Ran blameless postmortems for every Sev-2 incident and tracked follow-ups to closure.

SKILLS

Python, Spark, dbt, BigQuery, SQL

EDUCATION

B.S. Computer Science, Riverton State College, 2018
