SUMMARY

Smart contract developer with two external audits behind me. I write Rust and Solidity and spend most of my time on test harnesses.

EXPERIENCE

Senior Software Engineer, Black and Sons (2023 - Present)

- Maintained streaming jobs in Spark that feed fraud and pricing models.
- Owned push notification delivery and cut duplicate sends to near zero.
- Migrated twelve cron scripts into Airflow DAGs with alerting and retries.
- Profiled and fixed a memory leak in a Go service that restarted every few hours.

Software Engineer, Clark Ltd (2020 - 2023)

- Reviewed pull requests for an open-source wallet library and fixed its fee estimator.
- Mentored two junior engineers through their first production launches.
- Built the accessibility checklist for our component library and fixed the worst screen-reader bugs.

SKILLS

Rust, Solidity, Foundry, TypeScript

EDUCATION

B.S. Computer Science, Westbrook State University, 2016
