SUMMARY

Platform engineer who maintains internal developer tooling, CI pipelines, and secrets management for about two hundred engineers.

EXPERIENCE

Senior Software Engineer, Ross-Blankenship (2022 - Present)

- Moved order events onto Kafka and added idempotent consumers.
- Owned push notification delivery and cut duplicate sends to near zero.
- Rolled out a secrets manager and removed long-lived keys from repositories.
- Wrote the on-call runbook that the team still uses; pages dropped by a third the following quarter.

Software Engineer, Hart PLC (2019 - 2022)

- Reduced app start time on older Android phones by lazy-loading maps.
- Reviewed pull requests for an open-source wallet library and fixed its fee estimator.
- Automated certificate rotation that used to be a quarterly manual chore.

SKILLS

Python, GitHub Actions, Vault, Terraform, Bash

EDUCATION

B.S. Computer Science, Westbrook State University, 2015
