SUMMARY

Mobile and web developer who has shipped consumer apps for riders and drivers in three cities.

EXPERIENCE

Senior Software Engineer, Moore, Bailey and Yang (2022 - Present)

- Automated certificate rotation that used to be a quarterly manual chore.
- Profiled and fixed a memory leak in a Go service that restarted every few hours.
- Built a fuzzing harness that caught three invariant violations during audit prep.
- Built the accessibility checklist for our component library and fixed the worst screen-reader bugs.

Software Engineer, Murray, Lozano and Garcia (2020 - 2022)

- Found and fixed a rounding bug in a staking contract before mainnet launch.
- Maintained streaming jobs in Spark that feed fraud and pricing models.
- Cut p99 latency of the ledger API from 900 ms to 180 ms by moving reconciliation into a nightly job.

SKILLS

Kotlin, Swift, React Native, Firebase

EDUCATION

B.S. Computer Science, Lakeview Institute of Technology, 2016
