SUMMARY

Software engineer at a logistics company, building route optimization services in Go on top of PostgreSQL and Kafka.

EXPERIENCE

Senior Software Engineer, Reed, Williams and Mendoza (2022 - Present)

- Profiled and fixed a memory leak in a Go service that restarted every few hours.
- Implemented a vehicle routing heuristic that shortened average delivery windows.
- Built a fuzzing harness that caught three invariant violations during audit prep.
- Maintained streaming jobs in Spark that feed fraud and pricing models.

Software Engineer, Harmon, Marshall and Villanueva (2019 - 2022)

- Replaced a homegrown feature-flag service with an open-source one and documented the rollout.
- Reviewed pull requests for an open-source wallet library and fixed its fee estimator.
- Taught a lunch-and-learn series on SQL window functions for analysts.

SKILLS

Go, PostgreSQL, Kafka, gRPC, Docker

EDUCATION

B.S. Computer Science, Riverton State College, 2015
